ENERGY
COSTS**

Towel Rail Energy Saver

**Instantly Reduce the Running
Costs of any Heated Towel Rail**

Electric towel rails are prone to overheating and will waste surprising amounts of money by running well after towels are already warm and dry. Livella's HTR-ES Energy Saver is a revolutionary add-on that transforms any towel rail into an efficient, fully programmable and energy sipping appliance.

- ✓ **Select from Four Temperature Options**
- ✓ **Morning, Evening and Continuous Programs**
- ✓ **Luxurious Pre-Heat Cycle for Warmer Towels**
- ✓ **Completely Invisible - Installed Inside Wall**

Upgrade Any New/Existing Towel Rail

Enjoy instant savings by easily adding an HTR-ES to any new or existing electric heated towel rail. The unit is quickly installed out-of-sight behind any isolating switch.

Safe Temperatures for Families & Fabrics

Select one of four temperatures that is best suited to your family and fabrics. Options include tepid, warm, hot and max.

21st Century Convenience

Run your towel rail continuously or enable the morning and evening programs to save even more. Enjoy beautifully warm towels in the morning and a dry towel at night.

Slash Your Electricity Bills

Livella's HTR-ES combines temperature control and scheduling to deliver dramatic improvements in efficiency, which cannot be achieved with a timer alone. The savings will astonish you.

The HTR-ES will pay for itself in no time. Use the table below to see just how much money **you will save year after year.**

Towel Rail	Annual Savings	Towel Rail	Annual Savings
40W	\$80	80W	\$160
50W	\$100	90W	\$180
60W	\$120	100W	\$200
70W	\$140	110W	\$220

Savings based on a two hour morning and evening cycle, warm temperature setting and an electricity tariff of 26¢/kWh. Enjoy even more savings as electricity prices increase. Visit towelrailenergysaver.com to calculate your savings exactly.
